

PALAYAN CITY ICT DIVISION

PalaSumbong

Citizen Grievance & Reporting System

Empowering the Community through Technology

Modernizing Civic Engagement

A New Era of Transparent Governance

Mission for Better Governance

Transparent Connection

Establishing a direct, unfiltered link between the citizens and their local government officials.

Public Accountability

Fostering a culture of responsibility where every report is logged, tracked, and answered.

What is PalaSumbong?

A modern, user-friendly platform designed to empower citizens to easily report local issues, incidents, and grievances directly to the appropriate city departments.

- ✓ Streamlined communication
- ✓ Centralized database
- ✓ Data-driven decision making

 Palayan City View

Core Platform Values

Transparency

Real-time visibility into how the city handles public concerns.

Accountability

Promoting a sense of duty in every department head and staff.

Efficiency

Cutting through bureaucracy for faster response times.

Precision Geolocation

Gone are the days of vague directions. With our interactive mapping tool, citizens can pinpoint the exact location of an issue.

Precision allows the City Engineering or Traffic departments to deploy teams directly to the site without delay.

Visual Verification

Photo Evidence

Users can upload images to provide clear visual context for every report. This ensures that the departments are fully prepared with the right tools and personnel before arriving on site.

This visual verification loop significantly reduces false alarms and mischaracterized reports.

Optimizing Performance

3x

Response Efficiency

System Impact

By automating the routing of reports from the citizen directly to the desk of the concerned department, we eliminate manual bottlenecks.

The result is a system that works 24/7, even when the physical offices are closed, ensuring no grievance goes unheard.

Participating Departments

Department	Reporting Scope	Action Role
CDRRMO	Emergency, Flooding, Hazards	Disaster Response
ENRO	Waste, Pollution, Environment	Environmental Protection
Engineering	Potholes, Lighting, Infrastructure	Repair & Maintenance
City Traffic	Illegal Parking, Obstructions	Enforcement & Flow

How It Works

1. Report

Citizen submits issue with details and photos via the app.

2. Route

System automatically notifies the correct department head.

3. Resolve

Department resolves the issue and updates status in the system.

4. Close

Citizen is notified of the resolution and provides feedback.

Building a Better Palayan City

"Technology is just a tool. In terms of getting the kids working together and motivating them, the teacher is the most important." — Likewise, for a city, technology connects, but our people build the future.

THANK YOU

Building a Better Community, Together.
